

Plan drawing showing new bedroom / bathroom.

The bathroom is utilised as an 'en suite' at present but can be reconfigured as a communal bathroom

Street facade drawing showing new dormer window.

Street facing facade. Visible are the new dormer window and the reconstruction of an existing external staircase / retaining walls.

New bathroom

New dormer window in bedroom

New landscaping.

Loft renovation Norra Ängby

Completed 2023

This project involved the construction of a large new dormer window in the loft and the repair/reconstruction of an existing stone staircase and retaining walls. The house is located in an area of cultural and historic interest in Bromma and as such careful consideration was given to building in accordance with the local 'detaljplan' and other relevant design guidance.

The construction of a dormer window allowed the expansion and simplification of the master bedroom and the much needed introduction of light and space into the existing bathroom.
